## OVERHEAD MONORAIL CONVEYORS

Overhead Monorail Conveyor in the Textile Industry

Overhead Monorail Conveyor in the Automobile Industry

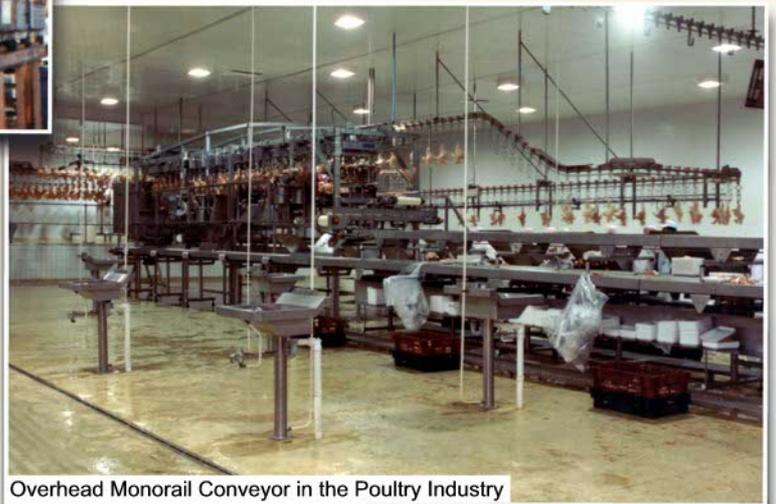

**Overhead Monorail Conveyors are used in the manufacturing and warehousing of items.**

**These conveyors are the most economical method of conveying goods to maximize floor space.**

**They can also be modified easily for additional workspace, relocation of equipment, increased building size or revisions in conveyor path.**

**Overhead Monorail Conveyor Systems have the advantage over ground based conveyor systems in that they take up no floor space allowing you the most productivity from every square foot of your facility.**

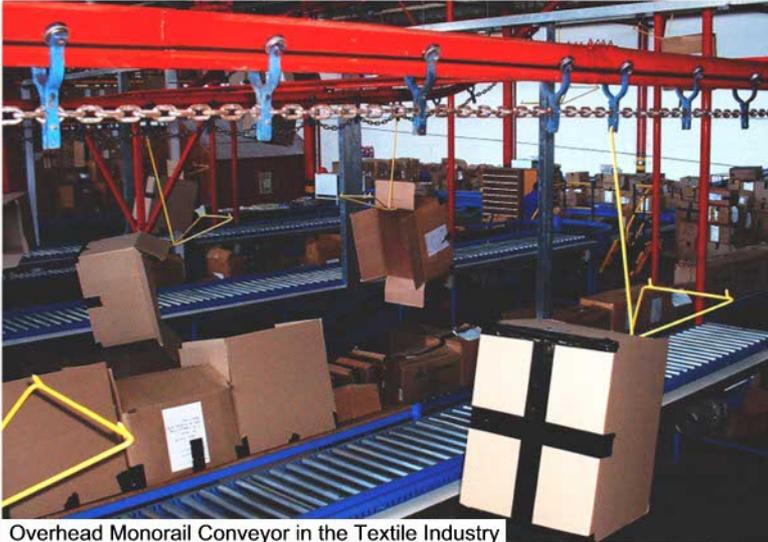

**Loads are suspended from attachments that are bolted directly to the crawl. Different carrier, hook, and tray arrangements are specifically designed and fabricated to suit the parts being transported.**

Overhead Monorail Conveyor in the Poultry Industry

Overhead Monorail Conveyor in the Coffin Manufacturing Industry

Overhead Monorail Conveyor in the Textile Industry

Overhead Monorail Conveyor in the Poultry Industry

Temporary Installation of Overhead Monorail Conveyor for Table Mountain Facility Upgrades was utilized for transportation of granite blocks used to build the current Cableway Station.
